

CHSU Global Learning Outcomes

The CHSU Global Learning Outcomes (GLOs) express a shared, campus-wide articulation of expectations for all degree recipients. They enable CHSU graduates to achieve clinical competence by applying professionally relevant, function knowledge in relational contexts relevant to the health professions: direct care, the team, the health system, the community, and the profession itself. Through development of the capacities represented by the CHSU GLOs, students acquire the habits and abilities that prepare them to become effective professionals and citizens throughout their lives.

The following GLOs are the guiding principles of the curricular design applicable to all CHSU education programs; therefore, programs and degree recipients will be required to demonstrate achievement for each GLO.

1. **Professionalism:** Seeking collaboration with patients, society, one's disciplinary colleagues, and other professionals through trust and shared accountability. Demonstrating humanistic behavior, including openness, respect, compassion, probity, honesty, trustworthiness, and integrity that supersedes self-interest; striving to achieve the highest standards of performance through invention, resilience and grit; continuing to learn and grow throughout life.
2. **Reflector:** Examining and assessing one's own performance and intellectual and emotional state of mind.
3. **Decision Maker:** Achieving desired results by systematically gathering appropriate data, considering circumstantial factors, and making decisions and plans that meet contextual standards of excellence.
4. **Learner:** Planning learning strategically then undertaking it with diligence. Receiving and reflecting on feedback. Adapting and making changes when necessary.
5. **Collaborator:** Coordinating identities, social processes and human interactions to achieve shared goals in a context of mutual respect (includes negotiation, coordination, escalation, conflict resolution).
6. **Communicator:** Oral and written exchange of ideas, sentiments, observations and opinions to achieve mutual understanding and influence.
7. **Practitioner:** Possessing the range of competencies required to achieve professional licensure.
